

A copy of the information is attached.

NHS Supply Chain holds information on its systems to enable monitoring of all products bought and sold by the business. The information is collected during the tender stage and throughout the lifetime of the Framework Agreement and is used to generate NHS Supply Chain's electronic catalogue; manage stock inventory; monitor sales activity and customer demand.

This request was sent to our Business Performance team who extracted the information from Microsoft Access databases, which hold information on all products sold by NHS Supply Chain. The results were obtained from a combination of our PRDB (Product Database) and TRDB (Transaction Database), and saved as a Microsoft Excel spread sheet. The criteria of the query focused on the specific NPCs sold during the financial period specified in the original request. These are figures for products sold into the NHS by NHS Supply Chain but that the NHS Trusts may also purchase from other sources.

An explanation of any terms that are not in common use:-

No Customer Board Region	Relates to hospitals which are not part of a Customer Region as yet, or are part of a Trust but have made a standalone purchase.
Framework Agreement Name	Agreement name that is held in our system
NPC	National Product Code. A unique reference allocated by NHS Supply Chain for each product held.
UOI	Unit of Issue, i.e the case size sold by NHSSC
Qty Supplied	Amount of product sold
Eaches	Product sold as 1 unit of product
Total Sales	Amount of product sold within period
Supplier	Awarded Supplier on the Framework Agreement
Base Description	Main Description of the product.
Secondary Description	More in depth description of the product
Brand	Name of Product brand
